Dear Partners,

We would like to introduce you all to the Product Development Team at The Cookie Jar Company:

- **Vince Marchica** – Vice President, Creative
- **Jill Will** – Product Development
- **Kathy DeGennaro** – Senior Designer
- **Tockeone Frazier** – Product Development Coordinator
- **Scott Murata** – Product Development Coordinator
- **Mark Shoeman** – Product Development Coordinator Assistant

Our goal is to work together to make the best product whilst maintaining the integrity of our brands. We are implementing a new system that will make the product development process more efficient. Please find the information packet including:

- **Product Development Contact List** – name, category, contact information for all members of our team
- **Product Development Process Outline** – PowerPoint presentation with step-by-step directions
- **Submission Form** – all product submitted should include a COMPLETED submission form. It is important for you to include your own product ID number for each concept submitted, but please note that we will assign a SUBMISSION APPROVAL number to all initial concepts and each product's SUBMISSION APPROVAL number must be included on all subsequent stages of each item's development, including pre-production and final production samples. Please see the Product Development Process Outline for more detailed information.
- **FTP/Digital Submission Directions** – for sending ALL product concept submissions and photos of product at pre-production and final stages
- **Mediabox Tutorial** – Mediabox is a secure website that you can access to download style guides, packaging, promotional material, and all the above listed items. The tutorial will provide directions on how to register.

The information packet may also be found on http://cookiejar.mymediabox.com.

Please read through all the materials carefully. If you have any questions, please contact us. Thank you for taking the time to read over the packet. We look forward to our continued partnership and success.

Best,
Cookie Jar Product Development
